PC 2000

The Malone Procut Topper is built exclusively for the intended use in the agriculture sector for the cutting of grass. The PC 2000 takes only the 'top' of the grass off and leaving a large stem.

Built for tractors from 30HP upwards this rotor machine is ideal to tackle growth up to 30mm diameter. It is fitted with two heavy duty blades which are fixed to a single rotor on a direct drive from a centrally mounted gearbox. The gearbox is specifically designed for this type of machine as it has an extended bearing housing and heavy duty bearings to support the cutting rotor.

Power is transmitted through a heavy duty P.T.O. shaft which is fitted with a shear bolt torque limiter. This protects the transmission from overload. Cutting height adjustment is by two side-mounted, wide based skids. This machine needs a tractor with minimum 30hp and maximum 60hp.

Features

Bevel Gearbox Drive | Single Blade Bar | Easy Adjustable Skids | Floating 'A' Frame
Semi Off-Set | Light Weight | Single Acting Hydraulic

Model	PC 2000
Working Width	1.5m (4.9ft)
Transport Width	1.8m (6ft)
Length	2.2m (7.5ft)
PTO Speed	540rpm
No. of Rotors	1
Power	22kw (30hp)
Weight	830kg (1830lbs)
