# TEDD-AIR 570 | 840

The Malone Tedd-Air rotary tedder range enables the farmer & contractor to increase the dry-matter content in your crops quickly by speeding up the drying process.

The Malone Tedd-Air range has a "Double Hook-Tine" design which enables the user to obtain more capacity while ensuring the forage remains free from soil contamination.

The "Tedd-Air 570" and the "Tedd-Air 840" are specially designed for forage tedding and spreading by means of rotating spring tines (double hook tines) attached to rotors.
